

SIA AI-Tech Roundtable Framework

30 architects · 2.5 hours per session · 5-session series · AI-assisted capture & synthesis

QR CODES —

QR Code 1 — Registration

Scanned on arrival (before session)

Links to a registration Google Form. Captures each participant's name and email. Populates a master attendance tab in Google Sheets. Facilitator can see who has checked in live. This registry is also used to address participants by name during the verbal elaboration step.

Fields: Full name ; Email address ; Firm (optional) ; Firm Type — SME, Mid-size; Large Firm ; Session number (auto)

QR Code 2 — Session questions (Will be on screen in case participants drops call and need to rescan the QR Code etc..)

Scanned when questions begin

Links to the session response Google Form. Each question is a separate section — the facilitator reveals one at a time by advancing the form and reveal questions, participants type their reply and submit. All responses, tagged by name from registration, feed into the master Sheet for the facilitator to view in real time.

Fields: Name (pre-filled from reg.) · Response per question · Rating (pulse-check Qs)

RUN OF SHOW — 2.5 HOURS

Pre-session **Participant registration** new Before start

QR Code 1 is displayed at the entrance or on tables as participants arrive. Each person scans, fills in their name and email, and submits. The tech support person monitors the registration Sheet on a tablet — once 28–30 participants are checked in, the session begins. Name data from this form pre-fills into QR Code 2 (session form) so responses are automatically attributed.

QR Code 1 — Registration form Google Sheets Tab 1: Attendees Live check-in count

0:00 **Welcome & session onboarding**

5 min

Facilitator welcomes the group, confirms attendance on screen ("We have 30 architects registered — thank you"). Briefly explains how the session works: participants will respond to questions via mobile, selected participants will be invited to elaborate verbally, and an AI-generated summary will be shared at the end. QR Code 2 (session questions) is displayed — participants scan now and keep the tab open on their phone.

QR Code 2 — Session form Confirm all phones connected

0:05 **Facilitator presentation**

15 min

5-slide deck on [TOPIC]. Slide 1: Why this matters now. Slide 2: The core challenge or dilemma. Slide 3: Current state of practice. Slide 4: Key tensions or trade-offs. Slide 5: Session objectives — what questions participants will explore together. No audience input yet; this is scene-setting only.

PowerPoint / Keynote 5 slides only No input yet

0:20 **Interactive Q&A round — 4/5 questions**

20 mins each questions total :80 -100 mins

The core of the session. Facilitator runs 4 questions in sequence. Each question follows the same loop below. The verbal elaboration step — where the facilitator selects specific participants to share — is what turns a passive survey into a live roundtable conversation.

PER-QUESTION LOOP — REPEAT × 4/5 QUESTIONS (~20 MIN EACH)

Step A

Display

Facilitator reads question aloud and reveals it on screen. Participants see it on their phone form simultaneously.

Step B

Type & submit

All 30 participants type their reply on mobile and submit. Live response count shown on projector. Facilitator waits for 25+ submissions before proceeding.

Step C

Facilitator reviews

Tech support opens master Sheet, filtered to this question. Facilitator scans responses on a tablet or second screen. Selects 1 interesting or contrasting response — calls that participant by name to elaborate verbally.

Step D

Verbal sharing

Selected participant elaborates (1–3 min). Facilitator may invite up to 3 or more participants to share their view. Brief open exchange. Facilitator closes the question and moves to the next.

Facilitator tip: choose participants whose written responses represent different viewpoints — not the most verbose. Aim for one "agreement", one "challenge", one "novel angle" per question.

Google Sheets Tab 2: Responses (live) Filter by question column Names visible to facilitator only

1:20 AI summary — live on screen

15 min

Tech support pastes all Google Sheet responses (all 4/5 questions × 30 participants + table notes) into AI using the standard prompt template. The AI summary streams live on the projector. Participants watch the synthesis of their own session appear in real time. Facilitator can read out key lines and invite a quick reaction before closing.

1:50 Close & distribution

5 min

Facilitator thanks participants. AI summary (formatted as a PDF) is emailed to all registered addresses within 30 minutes — using the email list captured at registration. Summary is also posted to the SIA Telegram group-optional. Next session topic (if confirmed) is teased. Running shared doc link shared for async follow-up.

ROLES ON THE DAY

Facilitator

- Delivers 5-slide presentation
- Reads each question aloud, reveals on screen
- Scans Sheet on tablet, selects participants by name
- Manages verbal sharing (1 + up to 3/4 per question @ 20 mins per question)
- Directs table discussions and report-back
- Reads out AI summary highlights at close

Tech support (1 person)

- Sets up both Google Forms and QR codes pre-session
- Monitors registration Sheet on arrival
- Keeps master Responses Sheet open on tablet for facilitator
- Advances question sections in the form
- Pastes responses into AI at 1:50 hr(before ending), projects output to screen
- Sends email + Telegram post after session
- Pre-assigned before the session
- Types key points during table discussion into Google Doc
- Notes fed into the AI summary

Participants (est max 30)

- Scan QR 1 on arrival to register (name + email)
- Scan QR 2 at 0:20 for session questions
- Type responses to all 4/5 questions on mobile
- If selected: elaborate verbally on their response (max 5 min)
- Join table discussion; receive AI summary by email + Telegram

5-SESSION SERIES

S1

Session 1
[TOPIC A]

S2

Session 2
[TOPIC B]

S3

Session 3
[TOPIC C]

S4

Session 4
[TOPIC D]

S5

Session 5

Cross-session synthesis

Session 5 Can be independent session or feeds all 4 previous AI summaries back into AI with a prompt asking for patterns, shifts in sentiment, and cross-topic consensus. The result is the series deliverable to SIA.

Use the same two Google Forms across all sessions — just add a "Session number" field so responses are segmented. All data accumulates in one master Sheet for easy cross-session analysis.
