

SIA AI-TECH ROUNDTABLE SERIES • SESSION 1 OF 5

Where Are We Now?

Mapping AI & Technology Adoption
Across Singapore Architectural Practice

30 Architects • 2.5 Hours • AI-Assisted Synthesis

The moment we're in

AI is no longer a distant technology trend. It is reshaping how buildings are conceived, documented, and delivered — right now. Singapore's architects face a critical inflection point: early movers are gaining real productivity and design advantages.

The gap between adopters and non-adopters is widening every year.

75%

of global AEC firms are actively piloting AI tools in design or delivery workflows

BIM

mandated for all public sector projects in Singapore — the foundation for AI integration is already in place

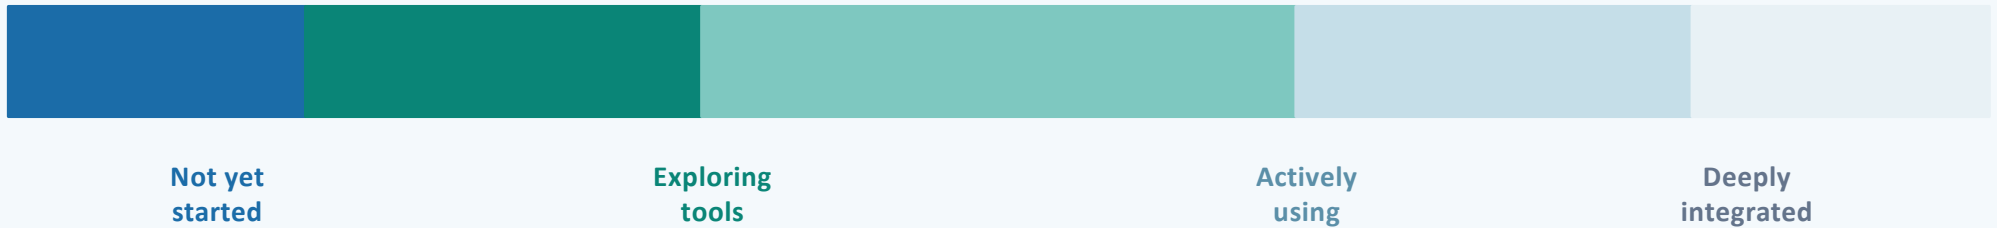

↑3×

productivity gains reported by early-adopter firms using AI for documentation and specification tasks

2030

by this year, AI-assisted design is expected to be standard practice in leading architectural firms globally

Adoption across the profession is uneven — and the gap is growing

Awareness gap

Many architects know AI exists but lack clarity on which tools apply to their workflows and where to start.

Skills gap

Formal training and CPD in AI/technology tools is limited. Most learning is self-directed, inconsistent, and slow.

Urgency gap

Clients, developers, and contractors are moving faster. The profession risks falling behind its own project ecosystem.

What this roundtable series is designed to do

Over 5 sessions, 30x5 architects will collaborate together — honestly and openly — to map the profession's relationship with AI, share what's working, and co-create a concrete action plan for SIA to act on.

01

**Where are
we now?**

Baseline mapping of
adoption

YOU ARE HERE

02

**What's holding
us back?**

Diagnosing real barriers

03

**What's
working?**

Peer sharing of wins

04

**Practice
4.0**

Defining the future-ready
firm

05

**What must
SIA do?**

Co-creating the action plan

Today's session — what to expect

5 QUESTIONS YOU WILL EXPLORE

1

How would you rate your firm's current AI & technology adoption?

2

Which specific tools is your firm using today?

3

Where has technology made the biggest difference in your workflow?

4

What does a typical digital working day look like in your firm?

5

In one word — what is your firm's relationship with AI right now?

HOW IT WORKS

Scan

Open QR Code 2 on your phone — the questions appear on your screen

Reply

Type your answer and submit. All responses are live in real time.

Discuss

Facilitator will invite selected participants to elaborate verbally

Synthesise

AI generates a live summary on screen — you see it before you leave

Receive

Full report delivered to your email within 30 minutes

Your responses are anonymous in the summary · The AI report will be sent to all participants by email
